

3-ph Isolating Transformer

We build our transformers exactly in the manner, that they fit into your machine in an optimal way. If it's necessary, we change the mounting form of our transformers until they suit your application.

Isolating voltage	:	up to 60kV_{eff} – 50Hz
Output power	:	up to 30kVA
Voltages	:	up to 1000V

This transformer type successfully passed a 125kV, 1.2/50µs-impulse test. This transformer is used by domestic and foreign telecommunication companies to protect their cellular phone transmitters.
